

# IS YOUR CHILD SAFE ONLINE?

If the answer is ...I'm not sure, it probably means they aren't, so why not ensure they're fully protected from online threats by installing the very latest in internet protection and monitoring systems

## HOW DOES IT WORK?

### BLOCKS

adult oriented web sites and chat rooms also inappropriate sites containing violence or gambling, it also has the ability to restrict or deny the use of unwanted applications or web sites such as MSN Messenger, Facebook and file sharing software including Limewire and Bit Torrent

### MONITORS

all internet and computer activity including web browsing, applications used and computer usage and enables these log files to be sent to any email address

### CONTROLS

time usage by setting limits for PC time (e.g. switch off PC after 10pm) and also independently internet time (e.g. switch off internet access after 9pm)

### SAFEGUARDS

your system by restricting or preventing access to certain Windows functions, such as the control panel, task manager and the registry

### PROTECTS

your child from any possible negative situations found on the internet such as peer pressure, alcohol and drug use, cyber bullying, grooming from online predators and lots more
